QAMMA

PROUDLY WELCOMES YOU TO THE
2ND ANTONIO MEUCCI GLOBAL TELCO AWARDS!

A Night to Remember...

The 2nd Antonio Meucci Awards 2024 was an evening of pure magic, gathering more than 300 guests for a celebration of innovation and excellence in the Telco industry.

The evening began with a lively welcoming reception, sponsored by Horisen, where attendees enjoyed an exquisite selection of champagne, wine, and canapés. This created the perfect atmosphere for networking, allowing peers to connect, socialize, and speculate on the highly anticipated results of the evening.

One of the evening's highlights was the Hall of Fame, known as the "Elegance Corner," which quickly became the point of attention. Sponsored by NGN CORP, this display had a constant line of guests eager to take photos, capturing beautiful moments. The excitement extended to the red carpet, where all the winners were interviewed, and it too saw long lines of crowds forming to celebrate their incredible achievements.

The centerpiece of the evening, the Antonio Meucci Awards Ceremony; the TELCOscars, did not disappoint. For the second year in a row, the results were both breathtaking and unexpected, capturing the audience's attention throughout. We extend our deepest gratitude to all nominees, and judges who made the event possible, as well as our Grand Sponsor, SAMA Telecom. Without you, the night wouldn't have been as magical.

For those unable to physically attend, the magic of the evening was brought to life for more than 500 viewers from around the globe via our live-streaming service. Thanks to mCore SMS Wholesale Platform, our live-stream with four different camera angles made it feel as though everyone, regardless of distance, was right there in the room, experiencing every moment firsthand.

The celebrations continued late into the night with a luxurious Gala Dinner, sponsored by Almuqet Systems, followed by an electrifying afterparty. DJ Robin Skouteris, a global legend, kept the energy high, as guests danced through the night with drinks flowing from our open bar, courtesy of AIRTIME TECH GLOBAL. Although the evening was supposed to conclude at 00:30, the energy was so infectious that no one wanted to leave. It wasn't until two hours later, after countless unforgettable memories, that the festivities finally came to a close.

A big thank you to all for making the 2024 Antonio Meucci Awards an unforgettable celebration!

BIGGER THINGS ARE COMING IN 2025...STAR TUNED!

*Thrilled and Honored,
The AMA Team*

THE ANTONIO MEUCCI AWARDS

WELCOMING RECEPTION

The Night's Grand Opening

18 SEP 2024 | 19:15 - 19:45

MELIÁ CASTILLA HOTEL

MADRID, SPAIN

WELCOME SPONSOR

Dear Esteemed Guests and Colleagues,

Time flies, and here we are once again in this magnificent amphitheater at the Melia Castilla Hotel to celebrate Telco's Excellence and Innovation with the 2nd Antonio Meucci Awards Ceremony!

The past year has been challenging in many ways. Over the last 10 months at the office, we often reminisced about the "bliss of ignorance" we experienced during the preparation of the 1st Antonio Meucci Awards. After the success of that inaugural event in 2023, this year, we were determined to exceed our own expectations in every aspect of the competition. More participants, more nominations, more excitement, new rules, countless adjustments—all necessary to ensure even greater success!

Last year, we achieved an impressive average rating of 9/10 in our customer satisfaction survey, setting a high bar for ourselves this time around. And let me tell you—it wasn't easy!

As a result, the 2nd Antonio Meucci Awards have been enhanced with changes requested by the people in our industry. These adjustments have made the competition more precise, more efficient, and even more enjoyable! One significant change is the venue. Our customers, nominees, and friends suggested moving to the Melia Castilla Hotel to make it more convenient for the participants of the WWC. After extensive negotiations (a special thank you to Santiago Marquez for his valuable assistance), here we are, ready to meet your expectations and provide an even more memorable experience.

The Struggle for 2nd and 3rd Place

Last year, only one of the top three finalists in each category won the Excellence Award, while the other two received High-Distinction Awards without knowing their exact rankings. Based on feedback from the nominees, we decided to change the process this year and reveal the complete evaluations from the judges. This new approach allows participants to know their exact rankings for 2nd and 3rd place.

As a result, the participant with the highest score receives the Excellence Award, considered the "Gold." The 2nd place finisher receives the Honors Award, considered the "Silver," and the 3rd place finisher receives the High-Distinction Award, considered the "Bronze." This approach is especially fair considering some categories had as many as 10 or 11 nominations!

The Winners are Waiting... Are You Ready?

The ceremony is about to begin, and over the next 100 minutes, you'll have the opportunity to celebrate, cheer, and perhaps be surprised by the results in most of the 28 categories. In addition, four special awards will spotlight individuals who have made unique and significant contributions to our industry. These honorary awards go beyond competition, and we are confident that when you see who is being honored, you will join us in celebrating from the bottom of your hearts. For us, this is the vision of the Antonio Meucci Awards: to always reward innovation, a positive attitude, and those who contribute to making the Telco industry an even better place.

In closing, I would like to extend my sincere gratitude to the 82 judges, the 150+ nominees, and the 15+ sponsors for their significant contributions to this unique and wonderful event. You are truly the heart and soul of this evening. Thank you for supporting us in shaping a competition where the best truly prevail!

I wish the top three finalists the best of luck, and to all of you, an enjoyable and memorable evening.

See you on stage—and a bit later on the dance floor, where we'll be moving to the beats of the legendary Robin Skouteris!

Sincerely,

Andreas S. Constantinides

A Legacy through the Antonio Meucci Global Telco Awards

In a world increasingly connected by the threads of communication, the Antonio Meucci Global Telco Awards stand as a tribute to the man whose groundbreaking contributions laid the foundation for modern telecommunications.

Antonio Meucci, an Italian inventor born in 1808 in Florence, is often overshadowed by more recognized figures. However, his ingenuity and perseverance have left a mark on the industry, and it is in his honor that we celebrate excellence through these Awards.

Meucci's journey into the world of telecommunication began with a deep-seated passion for innovation. A skilled engineer and inventor, he moved to Cuba in 1835, where he worked as a stage technician at the Teatro Tacón in Havana. His creative mind was always at work, and it was during this time that he began experimenting with electrical signals and sound transmission—a fascination that would shape his legacy.

In 1850, Meucci emigrated to the United States, settling in Staten Island, New York. It was here, in a modest workshop, that he developed the first version of what we now recognize as the telephone. Driven by a desire to communicate with his ailing wife, who was bedridden due to severe illness, Meucci designed a device that could transmit voice signals over a wire. This invention, which he called the "teletrofono," was a precursor to the telephone, predating Alexander Graham Bell's patent by several years.

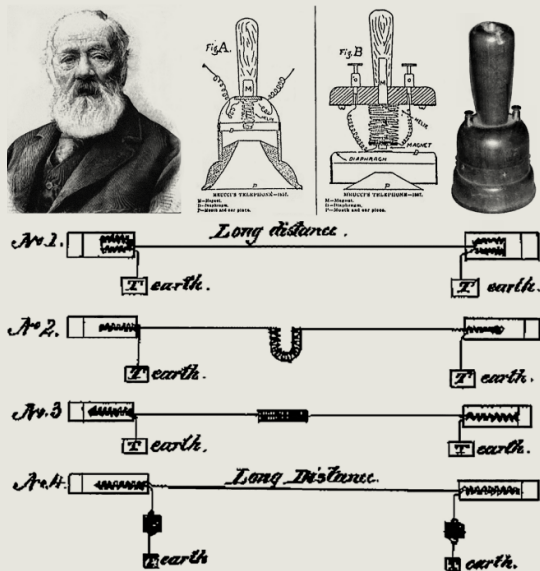

Despite his groundbreaking invention, Meucci faced significant financial difficulties. Unable to afford a formal patent, he filed a caveat in 1871—a type of preliminary patent that described his invention but did not protect it fully. During this time, Meucci’s detailed models and designs were lost, and his financial situation worsened, leaving him unable to renew the caveat. Meanwhile, Alexander Graham Bell, who had access to Meucci’s ideas, secured the patent for the telephone in 1876. Although Meucci fought tirelessly to claim his rightful place in history, recognition was not granted to him during his lifetime.

It wasn’t until 2002, over a century after his death, that Antonio Meucci was officially acknowledged by the U.S. Congress as the true inventor of the telephone. This long-overdue recognition was a justification of his work and a proof to his legacy in the field of telecommunications.

The Antonio Meucci Global Telco Awards are more than just a celebration of innovation—they are a symbol of justice, accuracy, and the importance of crediting those who truly deserve it. In naming these Awards after Antonio Meucci, we embrace the responsibility to honor the pioneers of our industry with the recognition they are due.

Our Awards System and Evaluation Phases are carefully designed to ensure that only the most deserving individuals and companies are celebrated, reflecting the spirit of Meucci’s own pursuit of fairness and excellence.

As we gather to celebrate the achievements of today’s leaders in telecommunications, we also pay tribute to Antonio Meucci—a man whose vision and determination have forever changed the way we connect with one another. His story is a reminder of the importance of innovation, and the belief that true recognition, though it may take time, is ultimately worth the pursuit.

SPOTLIGHTING THE DEFINING VOICES MEET THE JUDGES

The Antonio Meucci Global Telco Awards are defined by the highest standards of transparency and excellence, which are upheld by the participation of influential and experienced professionals from across the Telco industry. This year, we are proud to have assembled 83 exceptional Judges—individuals with remarkable careers and significant influence within their respective fields. Each Judge has been carefully selected not only for their expertise but also for their outstanding achievements in Telco. The assignment of Judges to specific categories is done with the utmost care, ensuring that conflicts of interest are avoided. No Judge is a direct competitor or affiliated with the Nominees they evaluate. This careful approach guarantees that the results celebrated at this Ceremony are both fair and reflective of true industry achievement.
